**Abstract of the Disclosure**

The composition A for dyeing fibers is obtained before use by mixing a first component A1, containing at least one enamine of the formula (I)

with a second component A2, containing at least one carbonyl compound. A multi-component kit for dyeing and, later on, decolorizing fibers, ~~the kit consisting of the dyeing agent A and a decolorizing component B containing a sulfite~~, and a method for temporarily dyeing hair with the composition for dyeing fibers A and later removing the dyed hair color with a the decolorizing component B containing a sulfite are also provided. The multi-component kit for dyeing and, later on, decolorizing fibers, separately contains the first component A1, the second component A2 and the decolorizing component B.
